PRESS RELEASE

RWA TO ADD AMADEUS AND SABRE LINKS TO SELL-IT SUITE

Links to the Amadeus and Sabre Global Distribution Systems (GDS) will be included in Version 4.0 of Sell-It Suite which is due for launch in early 2007.

The real-time links to Amadeus and Sabre will compliment the existing Galileo support provided in the current version of Sell-It Suite. With support for real-time availability and booking for no-frills carriers such as Easyjet and Ryanair and for Eurostar, Eurotunnel and 13 ferry companies, Sell-It Suite provides travel companies with real-time access to a wide variety of transport.

Commenting on the announcement, Mark Bradbury, Director of Business Development at RWA said, "The Amadeus and Sabre support will enable a travel company to either choose to use their preferred GDS or to use more than one GDS if they need access to net fares loaded in different GDSs. The GDS to be used can be set up on a contract by contract basis within Sell-It."
